

IN THE CLAIMS:

Please add new claims 33-36.

1-26. (Canceled).

27. (New) A bubble producing assembly, comprising:  
a housing;  
a frame having up to a maximum of four legs, with each leg connecting the frame to the housing;  
up to a maximum of four bubble producing devices, each bubble producing device having at least one loop; and  
wherein the bubble producing devices are positioned in spaced-apart manner, and on the same plane, on the frame.

28. (New) The assembly of claim 27, wherein at least one loop of at least one bubble producing device has a plurality of ridges provided thereon.

29. (New) The assembly of claim 27, wherein the frame defines an opening with one of the bubble producing devices positioned over the opening.

30. (New) The assembly of claim 29, wherein the assembly further includes a fan positioned inside the opening.

31. (New) The assembly of claim 27, wherein the up to a maximum of four bubble producing devices comprises exactly four bubble producing devices.

32. (New) The assembly of claim 27, wherein the up to a maximum of four legs comprises exactly four legs.

33. (New) A bubble producing assembly, comprising:  
a housing having an outlet;  
an air generator associated with the housing;  
a bubble producing device positioned adjacent the air generator;  
a first activator coupled to the air generator;  
a reservoir associated with the housing for storing a liquid;  
a pump system coupling the reservoir and the outlet; and  
a second activator coupled to the pump system for delivering the liquid from the reservoir out of the outlet;  
wherein the pump system utilizes air pressure for delivering the liquid from the reservoir out of the outlet.

34. (New) The assembly of claim 33, further including a power source coupled to the air generator and the first activator.

35. (New) The assembly of claim 34, further including a motor coupled to the air generator and the power source.

36. (New) The assembly of claim 33, wherein the pump system delivers a stream of liquid out of the outlet.
